

## International Fair PETROL STATION 2024

**The International Fair Petrol Station** is three days of meetings, numerous lectures and thousands of visits. Participation in our Fairs will provide you access to a probably completely new, but very wide group of recipients which are companies operating in the fuel and related sectors.

At our fair, in addition to fuel companies, every year we host many representatives of such industries as: automotive, industrial, energy, transport, food and many others.

We will expand the upcoming edition with the Nowoczesne Technologie Gazowe (MODERN GAS TECHNOLOGY) zone, to which we invite all companies related to the broadly understood gas industry (LPG, CNG, LNG, H<sub>2</sub>).

This year we also plan to organize, a zone where companies offering hydrogen technologies, HRS, etc. will be able to present themselves.

The exhibition will be traditionally accompanied by the CAR WASH ZONE - an exhibition of a car wash and the latest solutions for automatic and self-service car washes and washing devices.

From the beginning of its existence, the International Fuel Station Fair has managed to secure wide recognition not only on the domestic or European market, but also worldwide. In recent years, we have exhibited companies from countries such as : Belgium, China, Cyprus, the Czech Republic, Estonia, Finland, France, the Netherlands, Ireland, Germany, Sweden, Turkey, Ukraine, Great Britain, Italy.
