

Mobility Plaza®

Bluebasic srl

Bluebasic is an Italian engineering and manufacturing company active since 2005 in the AdBlue and urea solutions market.

Thanks to its long experience in AdBlue production (certified by VDA) Bluebasic can offer you either **ready to use AdBlue** in different formats or **AdBlue production plants** that make the product economical wherever is needed.

- Bluebasic AdBlue is approved by all main OEMs and OESs in Europe and is suitable for commercial vehicles, agricultural and construction machines and recently all new Euro 6 cars. AdBlue Bluebasic is produced according to ISO 22241.

- Bluebasic production plants are mobile and modular in order to allow the customers to choose the best solutions and they can be upgraded or easily moved to a new location when new logistic organization, due to market growth, is required.

All Bluebasic AdBlue production plants can be provided with:

- Quality procedures to run the plant according to ISO 22241
- VDA sublicense
- Urea AdBlue grade supply
